

Policy on Immunizations

Many diseases can threaten your student's health while they are away at college, most of which are completely preventable through immunization. Due to the close proximity of students to other students and community members, they are much more susceptible to contracting common diseases. Although Pacific Northwest Christian College does not require immunizations for students, the following are *strongly* recommended:

- COVID-19
- Measles/mumps/rubella (MMR)
- Td/Tdap
- Varicella (chickenpox)
- HPV
- Influenza
- Hepatitis A & B
- Meningococcal Disease
